Four-Part Webinar Series

Using SBIRT to Talk to Adolescents about Substance Use

One of the largest barriers to providing appropriate substance use services to adolescents is getting them to open up about their use and engage in conversation to reduce or eliminate it, if necessary. This four-part webinar series introduces health professionals to the SBIRT model as a way to learn from adolescents about their substance use, talk about what might motivate them to make a decision to reduce or abstain (if needed), and execute a plan to do so.

- Ideal for social work and nursing students, educators, and clinical supervisors, as well as mental health counselors, substance use professionals, medical professionals, professional counselors, psychologists, employee assistance professionals, and other helping professionals that are interested in learning about SBIRT
- Use with clinical supervision or watch together with your colleagues
- Free Certificates of Attendance for everyone
- Only need a computer/internet connection or a smartphone (compatible with PC, Mac, iPad, iPhone, Android)
- Closed captioning available
